## **DETAILED ACTION**

### ***Drawings***

1. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by the two patents to Airhart ('314, '674).

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by the patent to Fulkerson ('077).

Applicant's attention is directed to the PCT search report for a description of how the instant claims are rejected over the abovenoted Airhart and Fulkerson patents.

5. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Airhart ('870).

Per claims 1-6, Airhart discloses a seismic vibrations emission device to be mounted on a mobile platform. The device includes a vibration assembly (16, 28, 30, 32) and a ground hugging assembly (12, 14, 18). The vibration assembly is fixed to the ground hugging assembly by compensation members (44, 22).
